

BUSINESS BROADBAND

Premium ADSL and Fibre broadband

- Superfast and super-reliable
- On-site maintenance options
- Unlimited and Unrestricted
- Priority network speed
- Managed security options
- Fast ADSL network

We understand how important reliable and fast broadband is and have designed our packages with business in mind. A flexible and premium suite of ADSL and superfast Lightspeed™ Fibre broadband products for the demanding business environment - each configurable to your exact requirement. Completely un-restricted broadband means your business runs faster - with enhanced network priority

and elevated care levels across the entire network. Combined with our price-busting OneVoice line rental and call packages - you can save a small fortune as well as getting a better, more responsive service.

Fully managed firewall and onsite maintenance options are available with priority instant response and 4 hour onsite appointments throughout Cornwall.

Well connected

There are many parts to delivering broadband to your business: The "last mile" (premises to exchange) is dealt with by Openreach and then your connection passes to a multi-million pound, 20-node aggregation point network, interconnected across the UK and monitored around the clock. From there it passed directly onto our core network - which we've tweaked for optimum speed throughout.

Elevated Speeds

Often email and internet access is one of the most important utilities for any business - so our Business Broadband carries elevated priority as well as priority over other users at the exchange-level and on our network.

Customise your broadband... Maximise your broadband...

We're able to offer a full range of enhancements and upgrades to your broadband, for faster reliability or faster speeds: Annex M, Bonded ADSL, failover solutions (ADSL, Fibre and 3G Wifi redundancy options)

Uptime Guarantee

So confident are we in the quality of our broadband, and the award-winning support we provide, that we were the first ISP in the UK to guarantee its availability. So you know that when something does go wrong - and lets face it, it will, despite everyone's best efforts - we're doing everything we can, as quickly as we can, to get things up and running.

CorNetworks is an established and award winning ISP who's aim is to bring high-tech and enterprise-grade services to small and medium-sized businesses. With our own Tier 2 network spanning the globe, our own 24 hour support and operation center and a complimentary range of skills in-house including networking, telephony, programming and web engineering department. All of these combine to form something we think is unique: A **well connected ISP** that has the tools and expertise to deliver something truly remarkable - **high-specification services on budget**. CorNetworks provides a full range of internet and telephony services including hosting, telephony, email, data storage, network consultancy and web engineering.

FTTP, Leased Lines and Bonded ADSL also available. Contact us for the complete Internet access options for your business.

Custom and dedicated solutions available include Annex M and Line Bonding.

All prices exclude VAT. Your speed depends on whether your exchange is enabled for 21CN and the distance of your line from the Exchange. Typically lines less than 1KM will achieve speeds of 15Mbps+ on ADSL2+ and 5Mbps+ on ADSL MAX. Speeds are sync speeds only and will be lower during traditionally busy times (6pm to Midnight). Exchange Priority prioritises your data at the exchange level, typically increasing speed by about 20% and guarantees a minimum of 3 Mbps 90% of the time during the busiest 3 hours of the day and better priority of data at all other times. Download use is per calendar month. Overuse of download limits are charged at £6.38 per 5gig or part thereof. Priority Care prioritises any line faults by Openreach and recommended for business users. Full terms and conditions available from our website. "Elevated Data Priority". Peak usage quota includes all downloaded data and uploads. 1 full month's notice of termination required. You may supply your own router. Migrations to us or away from us are free. LLU migrations are currently charged at £40 as if they were new connections. BT-based Line required. UNLIMITED means unlimited but you are not permitted to host services (like web hosting, FTP heavy services, P2P, Chat, Gaming etc) on your broadband, these lines are intended for general business internet and email use only.
